Instructions for iPad or iPhone users to run Wireless Setup

(NOTE) You will only have to complete these instructions one time to setup your iPad or iPhone so that it will connect to the VCS network whenever you are on campus.

1. Open Settings and Tap Wi-Fi.
2. Select the Network named “VCS Setup”
3. Wait for it to show a blue check mark before proceeding to the next step.
4. Start Safari or Chrome and type the following address, 10.0.3.2, in the address bar and press Enter.
5. You should see the following screen.

If so, Tap Show Details
6. You should get the following screen.

![Screen with message: This Connection Is Not Private]

This website may be impersonating "10.0.3.2" to steal your personal or financial information. You should go back to the previous page.

Go Back

Safari warns you when a website has a certificate that is not valid. This may happen if the website is misconfigured or an attacker has compromised your connection.

To learn more, you can view the certificate. If you understand the risks involved, you can visit this website.

Tap visit this website
7. Enter your VCS Assigned User Name and Password. Then tap Log in.
8. The following screen will appear.

Tap Allow.
Tap Close.

9. Go to settings and click on **Profile Downloaded**.
10. Tap “Install”

11. Follow the Install prompts until you tap Done.

12. Go back to Settings and forget the VCS Setup Network.

13. The system will automatically connect you to the correct VCS WLAN connection. (Forget all other VCS WiFi networks except for VCS Student or VCS Staff).
